

Horizontal hair

By **Ketzia (Adventure Club)**

My brain was spinning and so was my head. It was so dizzy and windy my hair was in my face but it was so fun!

You don't have to be an alien to enjoy a **flying saucer**

By **Arabella (Adventure Club)**

It was fun riding on the swing with my friend. It was fast and high. I like it because some people can stand up and some can sit down.

By **Jode (Adventure Club)**

It took a lot of energy to push the saucer. I love to push rather than being the one to be pushed on the saucer.

By **Kaija (Adventure Club)**

It was fun being up in the air. It felt like I was in the sky. I liked it when Arabella made fun jokes that made me laugh. It was fun when I stood because I went side-to-side and felt more wind.

Moving 'donut' challenges **gymnastic balance move** By **Sophia G (Adventure Club)**

Is this a hard move? Yes and no. Yes, while I was balancing, the "donut" was moving. No, because I have done gymnastics for five years. This gymnastic balance move is done on floor exercises and on beams. I even saw circus performers in Russia do this move while on a running horse.

Exciting energy

By **Oliver (Discovery Club)**

I had Speed 5 to run away from the Wither Storm when we were playing Minecraft. My new sneakers are the fastest shoes in my house. When I run fast I get excited.

In step with DLG

By **Duncan (Discovery Club)**

We did "100" challenges to celebrate DLG's 100th birthday.

We did 100 steps up to the front door of the school. It took 5 trips. My favorite 100 challenge was the 100 metre sprint around the playground. Photo: Duncan, **Karma** celebrate the final few steps.

Walking the dog

A stroll at 8370 Cartier Street in October 2021 revealed:

Our birthday timeline posted to celebrate David Lloyd George School from 1921 to 2021 stretched from band aids (1920) to Star Wars last movie (2019) with many historical highlights in-between. DLG from “owie-wear” to “Obi-Wan”.

Our posted “100 comments for birthday 100” included practical present ideas from children like “paper...pencils...extra bricks” and a “hug machine”. Will one be invented by the time the “social distance” two metre rule ends?

Our “100” fitness challenges included 100 feet of spider web. This meant climbing up and down three times. DLG all the way, as in, Don’t Lose Grip.

Our paper stars, with printed wishes, hanging from the lunchroom ceiling were replaced with paper candles with “100” art and birthday wishes. Paper mache planets, a moon and a sun once hung with the stars. There never was a huge cake to go with all the candles. That was too much to wish for.

Photo: Fire drill: check. Earthquake drill: check. Wind drill: check, thanks to **David (Discovery Club)** who shows how to avoid being blown off a swing.
